participate in research

This research study requires **one** user session.

what we are doing

Data gathered from this study will be used to improve socially assistive robot technologies for children via machine learning methods.

why this study matters

Socially assistive robots will be used to improve developmental outcomes in children with disabilities and help teach typically developing children.

who can participate

Children ages 18 months to 6 years with no disabilities or with motor and communication disabilities/delays. **One** in-person session is required.

Meet Glus, our assistive animal toy!
